

# **Carpet Cleaning**

## **The Bane-Clene Way®**

## **We also do...**

- Upholstered furniture
- Dry cleaning of delicate fabrics
- Oriental carpets and area rugs
- Wallscapes and tapestries

## Did you know that...

...soil tracked into your home, especially in winter months, contains minerals and ice-melting chemicals that can damage your carpets?

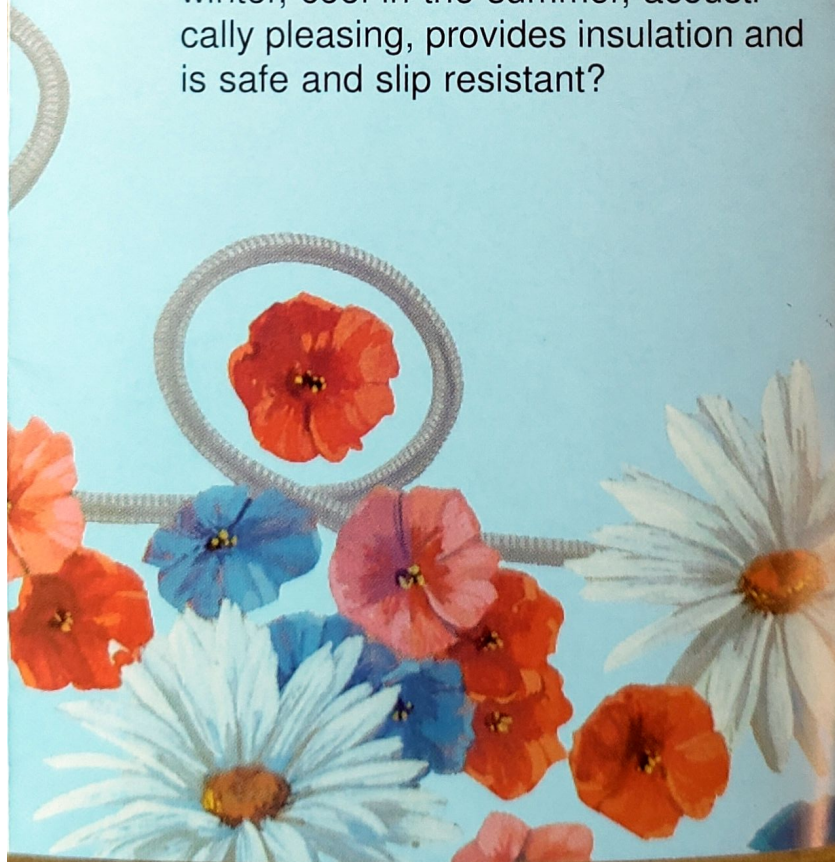

...minerals and chemicals can react with humidity in the air and may affect the dye in your carpets causing them to change color?

...gritty material scratches carpet fibers, changes light refraction and affects the way your carpet looks?

...clean carpets may relieve suffering from allergies, and protect the health of small children who play on the floor?

...carpet is comfortable, warm in the winter, cool in the summer, acoustically pleasing, provides insulation and is safe and slip resistant?

A whisper of vapor and a rush of air is all you hear as cleaning solution is applied and extracted from your carpets. All heavy equipment operates outside in our truck. There's no bulky equipment to mar your walls and furniture.

The patented \* Bane-Clene system heats water to just the right, safe temperature to prevent harm to delicate carpet fibers. A gentle, but effective, cleaning agent and pre-softened water-vapor loosens dirt and soil.

Immediate extraction assures sparkling-clean, residue-free carpets. The solution is returned to the truck through a sealed hose so there is no danger of spillage in your home. We do not use your disposal facilities and never, never, never pump dirty water onto your lawn, driveway or the street in front of your home.

Moist air is vented outside your home so excess humidity and odors do not permeate your furnishings. Carpets dry fast, look fresh, colors are brightened and the original texture is restored.

Our truck is quiet too, and will not disturb your neighbors. In the case of high-rise buildings, we have special portable equipment suitable for every cleaning need.

\*U.S. Patent Nos. 4,154,578 and 4,244,079

## Special Cleaning Solutions

Bane-Clene certified professionals have specially formulated treatments for blood, rust, pet stains and odors.

Scotchgard®, Sta-Clene® and Teflon® soil and stain retardants are available.

## **You can trust the Bane-Clene Way®**

The Bane-Clene system is recognized by leading carpet makers as a safe, efficient and thorough method of carpet maintenance for all carpet fibers including wool.

Operators are trained and certified under the auspices of Bane-Clene Institute, a training and certification school approved by the Carpet and Rug Institute.
